

Features

- Standard pin out; DIP24 packages compliant
- High efficiency – 88%@ 5V /3A Full Load
- Compact size – 1.27" x 0.65" x 0.4"
- 4:1 Ultra-Wide input range 4.5 – 18 & 9 – 36VDC
- 3.3V, 5V, 12V, 15V, ±12V or ±15V outputs
- -40°C to +60°C operation without derating
- MTBF≥2,000,000 hours @50°C GB (BellCoreTR-332)
- No life-span constrained Capacitor inside
- No minimum load requirement
- Output current limit and short circuit protection
- Output over-voltage protection
- Output voltage trim range of -10%, +10%
- Input under-voltage lockout
- Input-to-output isolation upto 6K VDC
- Thermal shutdown
- RoHS compliant
- SMT package available
- **UL60950-1 and EN60950-1 recognized (pending)**

Description

ESAN converter series is composed of Isolated, board-mountable, fixed switching frequency dc-dc converters that use synchronous rectification to achieve extremely high power conversion efficiency. These DC-DC converter modules use advanced power processing, control and packaging technologies to enhance the performance, flexibility, reliability and cost effectiveness of mature power components. Each module is supplied completely encased to provide protection from the harsh environments seen in many industrial and transportation applications.

Features

- High efficiency – **90%@ 5V Full Load**
- Save **50%** board space
- Standard pin out; **Fully replaceable** with **2"x1"** package
- **2250VDC I/O Insulation** (basic insulation)
- Patented architecture and control circuitry
- 3.3V, 5V, 12V, 15V, ±12V, ±15V outputs
- High power up to **20W**
- Free air convection form **-40°C to +60°C**
- Input under-voltage lockout
- Output current limit and short circuit protection
- **IEC950, EN60950 and UL1950 pending**

Description

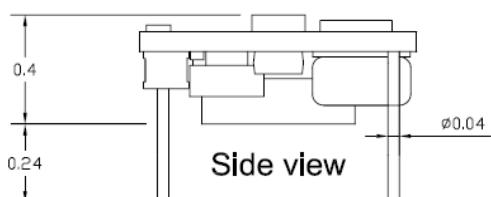

The new **ESO** series converters are targeted specifically at the telecommunication, industrial electronics, mobile telecommunication, and distributed power markets. These 12 members accept two wide input ranges from 18-36 & 36-75 VDC and provide single or dual outputs. All models feature fixed switching frequency operation, input under voltage lockout, over-temperature protection, output over-voltage protection, output current limiting, and short circuit protection.

The converters combine creative design concept and conservative component selection to achieve very high reliability, high performance and low cost.

Features

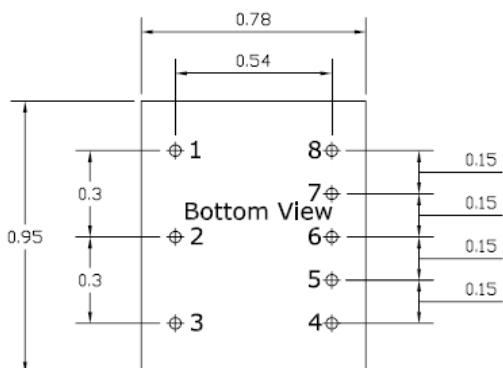

- High efficiency – **Synchronous Rectifier Topology**
- 2250V **Isolated Insulation** (input to output)
- Patented architecture and control
- **On-board** Input differential PI-filter
- Ultra wide 2:1 & 4:1 input ranges
- Industry-Standard **DOSA** pinout
- Standard **1/32th Brick** Foot-print: 0.78" by 0.95"
- PTH versions
- Fixed-frequency Operation
- Hiccup Overcurrent protection
- Fully protected: OVP, OTP, OCP and UVLO
- Remote Sense & Remote Enable Control
- **IEC950, EN60950 and UL1950 pending**

Description

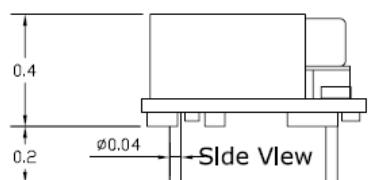

ESU Series high-current, high-efficiency, isolated converters are designed to be compatible with industry **1/32th Brick Standard** footprint and pin assignment. The ultra-wide 18 to 75 input range facilitates operation from 24V and 48V; eliminating the need for multiple host-system circuit-pack designs, and reducing the number of brick part numbers in inventory, in applications such as wireless base stations.

Features are basic insulation, start-up into highly-capacitive loads, and low conducted and radiated EMI. Interface features include: remote on/off, remote output voltage sensing, and industry-standard output trim. Protections include: over-voltage, under-voltage, over-current, and over-temperature.

Description

STB Sixteenth-Brick converter series is composed of Isolated, board-mountable, fixed switching frequency dc-dc converters that use synchronous rectification to achieve extremely high power conversion efficiency. These DC-DC converter modules use advanced power processing, control and packaging technologies to enhance the performance, flexibility, reliability and cost effectiveness of mature power components. Each module is six-sided metal case enclosed to provide protection from the harsh environments seen in many industrial and transportation applications.

Features

- High efficiency – **Synchronous Rectifier Topology**
- Fixed switching frequency provides predictable **EMI**
- **No life-span constrained Capacitor** inside
- Single wire connection for **Load Share**
- No minimum load requirement
- Output current limit and short circuit protection
- Output over-voltage protection
- Remote sense for the output voltage
- Output voltage trim range of -10%, +10%
- Input under-voltage lockout
- Input-to-output isolation 2250V
- Thermal shutdown
- RoHS compliant
- **UL60950-1 and EN60950-1 recognized (pending)**

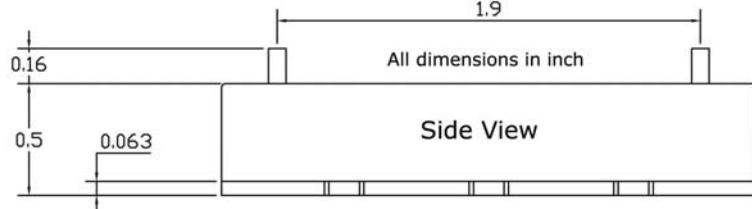

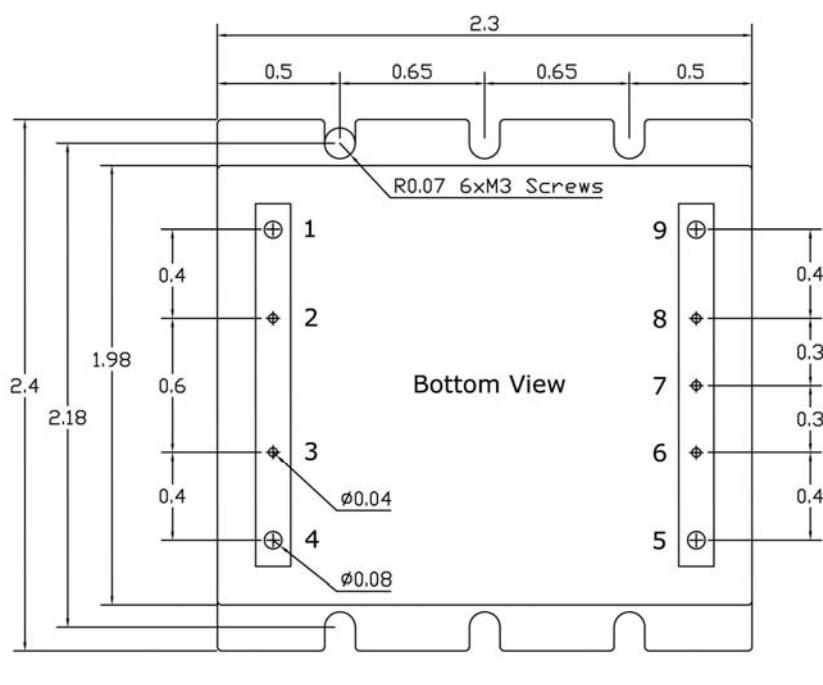

Description

SHB Half-Brick converter series is composed of Isolated, board-mountable, fixed switching frequency DC-DC converters that use synchronous rectification to achieve extremely high power conversion efficiency. These DC-DC converter modules use advanced power processing, control and packaging technologies to enhance the performance, flexibility, reliability and cost effectiveness of mature power components. Each module is six-sided metal case enclosed to provide protection from the harsh environments seen in many industrial and transportation applications.
